Occupation growth by 2022 in the UK:

The region's largest occupational group (professionals) is set to grow nationally, echoing the region's desire to have a highly skilled labour force

Almost half of the North East's labour market is based in occupations set to decline (43%), which could have a major impact on employment in the region

What are employers looking for?

In the North East:

23%

(16-64)

DO NOT have 5 x A* - C GCSE qualifications (or equivalent)

4.3%

(16-64)

Have a trade apprenticeship

Relevant work experience

40 Significant, 26 Critical

Vocational Qualifications

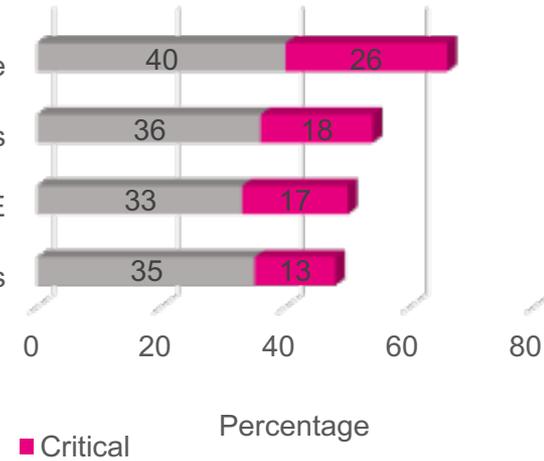

36 Significant, 18 Critical

Maths and English GCSE

33 Significant, 17 Critical

Academic qualifications

35 Significant, 13 Critical

The number of apprentices is higher than the UK average, which may reflect the skilled trades prominent within the NE labour market.

67% of employers view work experience as significant/critical when recruiting. An increased focus on improving the quality of the work experience offer is vital.

The number of people without an NVQ Level 2 or higher is more than the UK average, meaning that schools in the NE will have a big challenge to improve standards in line with the rest of the country

By 2022:

18%

Of the total UK working population will not have 5 x A* - C qualifications

What skills are in short supply?

70%

Of employers who reported having vacancies that were difficult to fill due to skills shortages believe applicants lack:

Automotive engineer
Chemical plant process operator

Warehouse operative

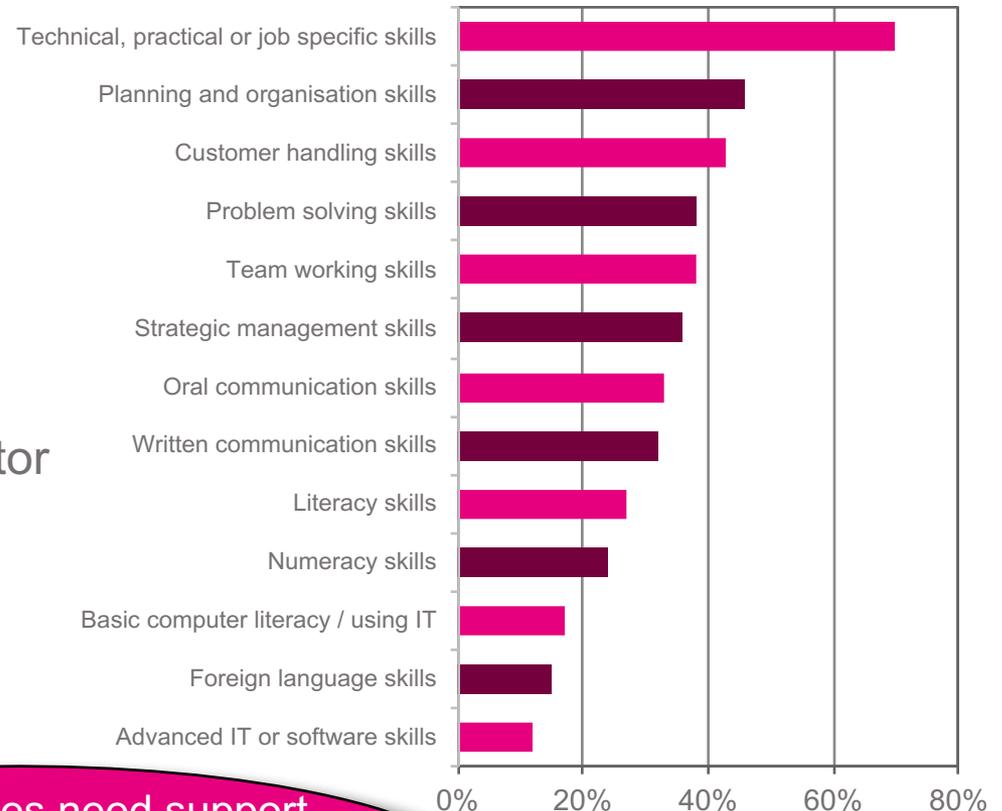

Energy Engineer

Doctor
Nurse
Chemist

Skills lacking among applicants

Schools/colleges need support from employers to develop required skills for local workforce e.g. manufacturing/engineering
