Level 1/2 Hospitality and Catering: Unit 1-1.3.2 -Food safety

Every food business lawfully needs to ensure the health and safety of customers whilst visiting their establishment. To ensure this, they need to take reasonable measures to avoid risks to health. HACCP is a food safety management system which is used in businesses to ensure dangers and risks are noted and how to avoid them.

HACCP table All food businesses are

Here is an example of a HACCP table – it states some risks to food safety and some control points.

s uce or	Hazard	Analysis	С
d by all that	Receipt of food	Food items damaged when delivered / perishable food items are at room temperature / frozen food that is thawed on delivery.	Check that the the tween 0°C -18°C and -2 to standard.
g.	Food storage (dried/chilled/frozen)	Food poisoning / cross contamination / named food hazards / stored incorrectly or incorrect temperature / out of date foods.	Keep high-ris fridge. Stock regularly.
s food harm hree	Food preparation	Growth of food poisoning in food preparation area / cross contamination of ready to eat and high-risk foods / using out of date food.	Use colour co prevent cross regularly. Ma
emical ts. al or	Cooking foods	Contamination of physical / microbiological and chemical such as hair, bleach, blood etc. High risk foods may not be cooked properly.	Good person Use a food p 75°C. Surfac
is	Serving food	Hot foods not being held at correct temperature / foods being held too long and risk of food poisoning. Physical / cross-contamination from servers.	Keep food ho Make sure st different spoo at 5°C or belo

assess and review food safety risks

- · identify critical control points to reduce remove the risk from happening
- ensure that procedures are followed members of staff
- keep records as evidence to show the the procedures in place are working

Food Hazards

required to:

A food hazard is something that makes unfit or unsafe to eat that could cause h or illness to the consumer. There are thi main types of food safety hazards:

- Chemical from substances or cher contamination e.g. cleaning products
- Physical objects in food e.g. metal plastic.
- Microbiological harmful bacteria e.g. bacterial food poisoning such as Salmonella.

Critical Control Point

the temperature of high-risk foods are C and 5°C and frozen are between -22°C. Refuse any items that are not up

isk foods on correct shelf in k rotation – FIFO. Log temperatures

coded chopping boards. Wash hands to ss-contamination. Check dates of food ark dates on containers.

onal hygiene and wearing no jewellery. probe to check core temperature is ce area & equipment cleaned properly.

not at 63°C for no more than 2 hours. staff serve with colour coded tongs or oons to handle food. Cold food served low. Food covered when needed.
